

Eye Find

DONT BE BLIND, USE EYE FIND

An efficient new solution for tracking the last location of any attachments and equipment including:

- Buckets
- Tools
- Skip bins
- Surveying Equipment
- Escavator Attachments

How does it work?

GPS units attached on vehicles will read the location of any attachments which are fitted with our RFID tags.

This enables the user to retrieve reports on the last locations of any attachments so that they can be found and tracked quickly between job sites.
