

Our Eye recommended Wialon Mobile Application

Mobile Client for Wialon is available on two platforms — Android and iOS.

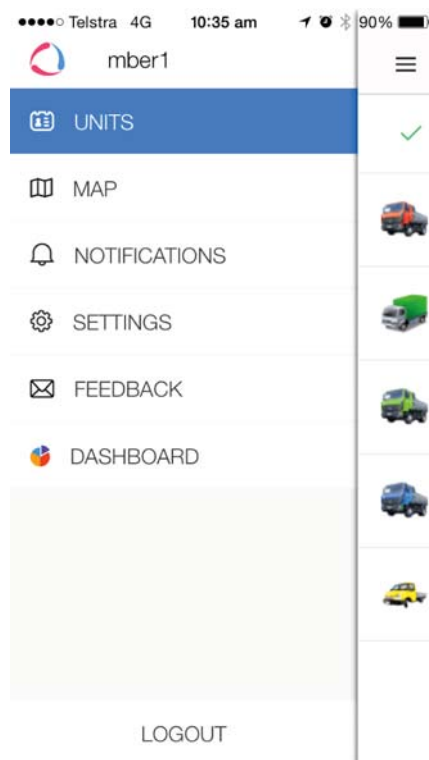

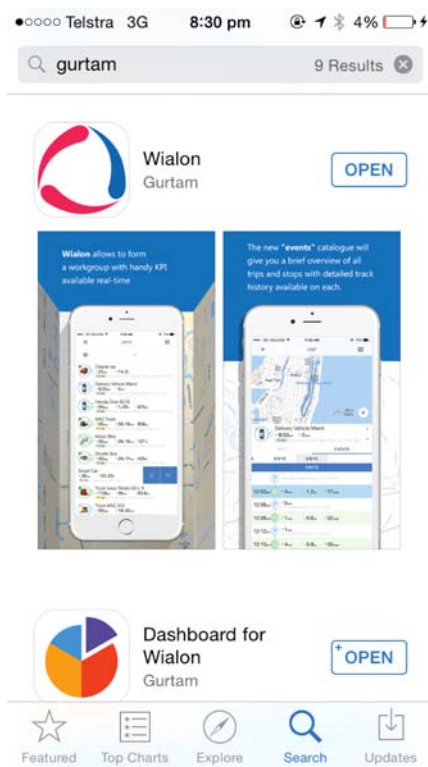

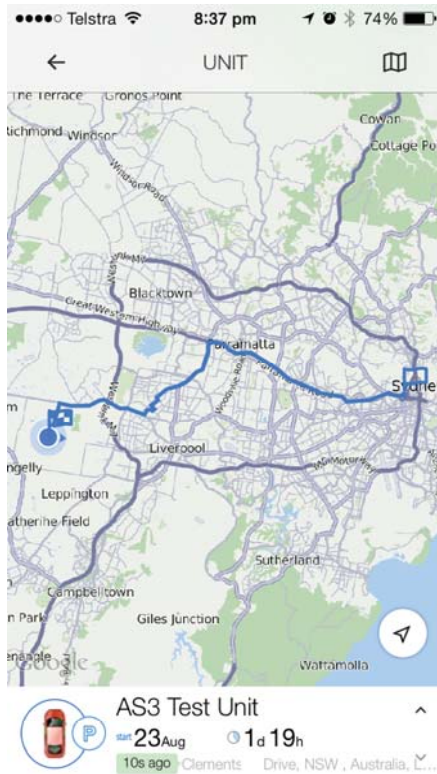

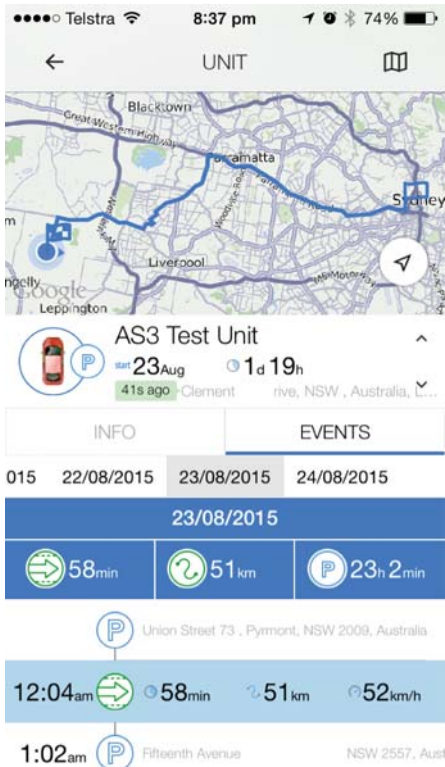

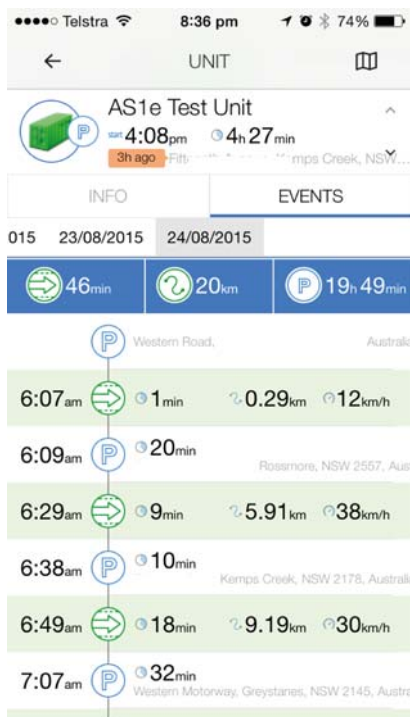

To down your new GPS tracking mobile phone App.

Go to your App Store or Google play download devise

Search for Gurtam and select Wialon App (pic below)

Download and run – insert your user name and password of your account

Here is the list of some arbitrary signs you will encounter in the mobile application:

Current state

UNIT HALT

UNIT MOVING & SPEED

PARKED

LAST KNOWN STATE DETECTED

Figures on the right show when the state began and for how long it has continued, and travelled distance is displayed for movement. Speed is taken from the most recent message.

Unit's current state and ignition as well as passed events are available only if you have 'Query messages or reports' right.

Optional signs (ignition)

ignition on

Available only if the unit has ignition sensor properly installed and adjusted.
