Key benefits

- Effective communication “dispatcher-driver-client”;
- Precise order information to avoid misdirected orders;
- Preliminary analysis of key performance indicators;
- Option to view files attached to the order anytime and anyplace;
- Import capabilities for the companies utilizing third-party accounting systems for order list generation;
- Time and cost-saving due to relevant fleet allocation between delivery areas binded to warehouses;
- Default characteristics for new orders;
- Automatic order distribution based on relevant criteria;
- Option to adjust preliminary route;
- Time saving for the office and the field due to automatic route sheet creation;
- Comprehensive analysis of mobile employee performance characteristics based on order reports;
- Chat with a driver and option to send photos.

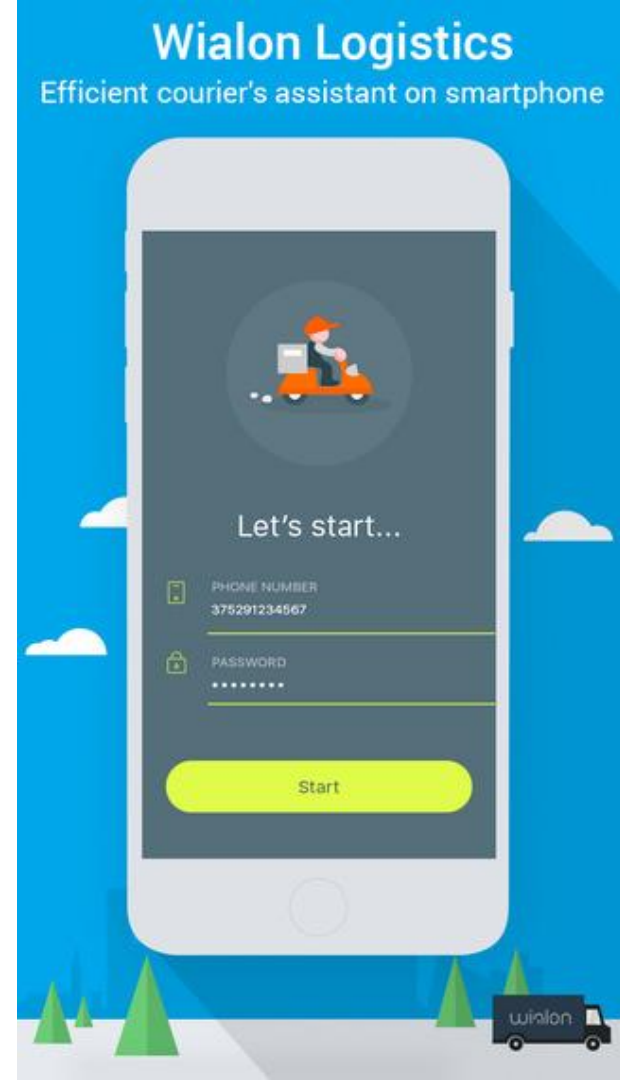

Wialon Logistics

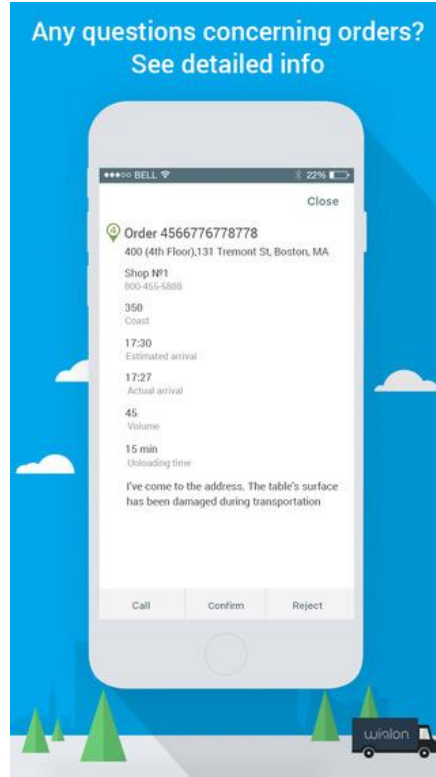

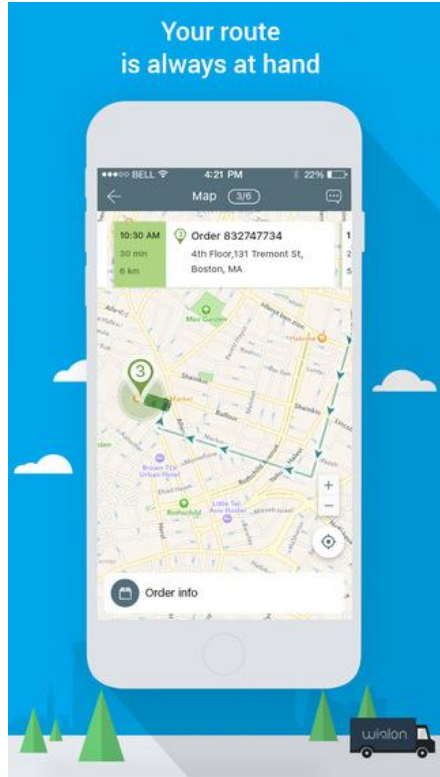

Mobile version

**For delivery men
and other mobile
employees**

First steps:

1. Create a driver in Wialon system and bind him to a unit
2. Enter phone number to start authorization procedure
3. Check driver binding to a unit

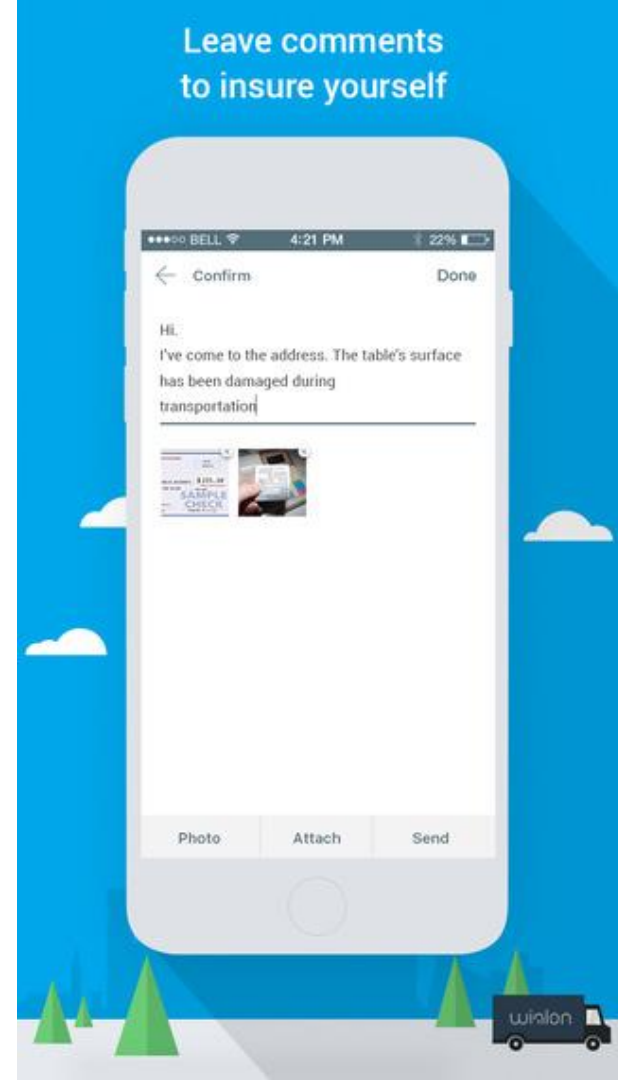

Enjoy quick access to order information and visualization on the map.

Get relevant information on your whereabouts, distance to order and delivery progress.

Effective communication:

1. Notify dispatchers of confirmed deliveries or rejected orders.
2. Send photos and comments concerning delivery process.
3. Deal with clients on the phone.

Key benefits

- Tablet version to simultaneously view orders table and mapping;
- iOS and Android versions;
- Quick connection with clients and dispatchers;
- Single vehicle or the whole route visualization;
- Multiple map layers and photo quality selection;
- Option to review orders for the specified period and switch between routes;
- Option to turn your mobile device into a personal GPS tracker.
